

## **Quinnipiac River Watershed Association (QRWA) Seeking Volunteers for Year-Round Watershed Cleanup & Improvements.**

The Quinnipiac River Watershed Association has formed a Quinnipiac River Cleanup Committee (QRCC) that will facilitate year-round watershed cleanup and improvements. This could include anything from an area clean up to a larger mitigation project.

The Goals of the QRCC are:

- create a sustainable committee that will work to improve the entire Quinnipiac River Watershed and in turn, your local community.
- achieve a partnership with local volunteers in each of the watershed towns to help with any projects that are undertaken by the QRWA.
- establish a local contact that will assist to organize local volunteers on an “as needed bases”
- obtain sponsorship from local businesses to help cover the cost of projects undertaken by the QRCC
- initiate a process to ensure that resolutions will be prioritized and resolved in a timely manner.

The Quinnipiac River Watershed Association will also be setting up a direct access path from the public to the Quinnipiac River Cleanup Committee to report any issues that impact the watershed.

Interested parties wishing to help us achieve these goals should contact Quinnipiac River Cleanup Committee Chairman, Tim Cutler at [grivercleanup@att.net](mailto:grivercleanup@att.net)
